

MATTHEW MALNAK

Platform & Integration Engineer | ServiceNow · Enterprise AI Agents

New York Metropolitan Area | matthewjmalnak@gmail.com | matthewjmalnak.com | linkedin.com/in/matthew-malnak |

SUMMARY

Platform and integration engineer with 2+ years in ServiceNow administration and development within a GxP-validated pharmaceutical environment: catalog, knowledge, workflow, integrations, and change control. Recently took over as SME for the company's Moveworks AI agent, owning its integration layer across ServiceNow, Microsoft Teams, MS Graph, Active Directory, Entra ID, and DocuSign, including Agent Studio plugin development, authentication and permission design, and cross-system root-cause analysis.

EXPERIENCE

Insmmed Incorporated

IT Support Engineer

Bridgewater, NJ

August 2024 – Present

- SME and POC on Moveworks AI agent development on a live production platform serving 2,000 employees; shipped fixes to production restoring the software access request path.
- Rebuilt request routing across ~112 catalog applications in Agent Studio (HTTP actions, custom data types, conversational processes, plugins) and allowed for RITM approvals in chat.
- Built the agent's integration surface across ServiceNow, Microsoft Teams, MS Graph, Active Directory, Entra ID, and DocuSign; drove Teams bot delivery through Entra app registration and Azure Bot provisioning.
- Consolidated the self-service software catalog by ~50% and rebuilt search metadata so portal search returns accurate results.
- Restructured the ServiceNow knowledge base — 100+ articles authored, approval flow redesigned, templates standardized for AI parsing; caught a search-ingestion conflict and mapped migration tradeoffs before a blind swap.
- Stood up sandbox and dev environments with on-prem agent deployment (Docker on VM) against Active Directory on an isolated network.
- Automated AD attribute sync to AlertMedia via PowerShell for 24/7 support verification; validated ADSync auto-disablement, removing a manual offboarding step. Okta and DocuSign admin; supported SOX/FAIT audits.
- Deliver first-day IT onboarding for 10+ new hires weekly, staff the techbar for walk-up support, and primary support for offboarding execution and DocuSign administration — daily queue exposure that informs what the AI agent is built to deflect.

IT Support Engineer Intern

May 2024 – August 2024

- Built ServiceNow catalog items, workflows, and scripts for a hardware provisioning project, including region-dependent mobile device request routing; added an Active Directory location attribute (loccode) after the existing field proved unreliable.
- Remediated 300+ stale Active Directory device records in three days, improving inventory accuracy by 25%, and cleared 200+ onboarding tasks in one week during peak hiring.

Rutgers University, Office of Information Technology

Help Desk Consultant

Piscataway, NJ

July 2022 – August 2024

- Promoted from Level 1 to Level 2 within four months; trained incoming consultants on troubleshooting methodology while resolving 50+ support requests weekly.

SKILLS & CERTIFICATIONS

Certifications: TestOut Security Pro (2024) | ServiceNow Certified System Administrator (in progress)

ServiceNow: Development (scripting, Flow Designer, catalog items), Service Catalog, Knowledge Management, Flow Designer, Advanced Work Assignment, Employee Center, UAT & CAB change control

AI & Integration: Moveworks Agent Studio (HTTP actions, data types, conversational processes, plugins), Microsoft Graph, Azure Bot Service, REST APIs, Postman, JWT

Identity & Endpoint: Active Directory, Entra ID, Okta, Intune, Jamf, Carbon Black, Workspace ONE/AirWatch, DocuSign, AlertMedia, Office 365, Tanium

Languages & Infrastructure: PowerShell, Python, Docker | Windows, macOS, Linux

Familiar: JavaScript, SQL, HTML/CSS, React

PROJECTS

Offboarding Audit Tool: Consolidates device, hardware, and account data from every required system of record into one offboarding view, surfacing outstanding hardware and account actions per user.

matthewjmalnak.com: Personal portfolio website built with React, Tailwind CSS, and React Router for multi-page navigation.

EDUCATION

Rutgers University

Dual B.A., Information Technology and Criminal Justice · Cum Laude · GPA 3.5/4.0

New Brunswick, NJ

May 2025
